Passive Electromagnetic Sensors for Autonomous Wireless Networks

Guest Editors:

Prof. Dr. Hervé Aubert
Laboratoire d'Analyse et d'Architecture des Systemes (LAAS), Centre National de la Recherche Scientifique (CNRS), 7 avenue du Colonel Roche, 31031 Toulouse, France

Dr. Patrick Pons
Research Director from National Center for Scientific Research (CNRS), Laboratory for Analysis and Architecture of Systems (LAAS), Micro and Nano Systems for Wireless Communication team (MINC), University of Toulouse, Toulouse, France

Deadline for manuscript submissions:
closed (20 February 2019)

Message from the Guest Editors

Dear Colleagues,

The contents of this Special Issue deal with progress in the design, modeling and performance evaluation of novel electromagnetic sensors. Fully passive and wireless electromagnetic sensors are actually very good candidates for measuring physical or chemical quantities in harsh environments and/or for applications requiring sensing devices with low-cost of fabrication, small size and long-term measurement stability. Passive electromagnetic sensing devices convert typically the variation of the quantity of interest (such as, e.g., pressure, temperature or gas concentration) into the measurable variation of an electromagnetic wave descriptor. We invite authors to contribute original research articles, as well as review articles, which stimulate the continuing efforts in innovative solutions for electromagnetic sensors. [...]

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
