Table-S1: Length of record and spatial coordinates of the data for 13 rainfall stations in and near the
Lake Tana basin; locations are plotted in Figure 1

| No | Name of Stations | Records | X | Y |
|----|------------------|-------------|--------|---------|
| 1 | Adet | 1986 - 2009 | 335182 | 1247364 |
| 2 | Addis Zemen | 1974 - 2014 | 366153 | 1340125 |
| 3 | Bahir Dar | 1961 - 2014 | 327373 | 1282803 |
| 4 | Dangela | 1969 - 2011 | 263966 | 1244823 |
| 5 | Debre Tabor | 1992 - 2013 | 391084 | 1312374 |
| 6 | Delgi | 1993 - 2014 | 284194 | 1345775 |
| 7 | Gasay | 1987 - 2014 | 407399 | 1304579 |
| 8 | Gonder | 1952 - 2014 | 309683 | 1360347 |
| 9 | Gorgora | 1987 - 2014 | 306441 | 1363687 |
| 10 | Maksegnit | 1987 - 2014 | 343457 | 1370102 |
| 11 | MekaneEyesus | 1987 - 2014 | 396868 | 1283335 |
| 12 | Merawi | 1987 - 2014 | 299679 | 1262059 |
| 13 | Zege | 1987 - 2014 | 316880 | 1291713 |
| 14 | Gurer | 2013 - 2014 | 309286 | 1314548 |
| 15 | Jigrfa | 2013 - 2014 | 338010 | 1316687 |

Table S2: Percentage weights based on Thiessen polygon method for the rainfall station for calculating the
12 Lake Tana rainfall

| Stations | Land-based stations (%) | Lake+land-based stations (%) |
|-------------|----------------------------|------------------------------------|
| Bahir Dar | 1.4 | 1.3 |
| Addis Zemen | 6.4 | - |
| Gorgora | 34.9 | 19.6 |
| Maksegnit | 4.5 | 1.8 |
| Delgi | 22.9 | 13.8 |
| Zege | 29.8 | 6.7 |
| Gurer | - | 30.6 |
| Jigrfa | - | 17.5 |
| Total | 100.0 | 100.0 |

14

16 Table S3: Slope intercept and R² for the linear regression of monthly gauged discharge and the inflow to and water loss from Lake Tana

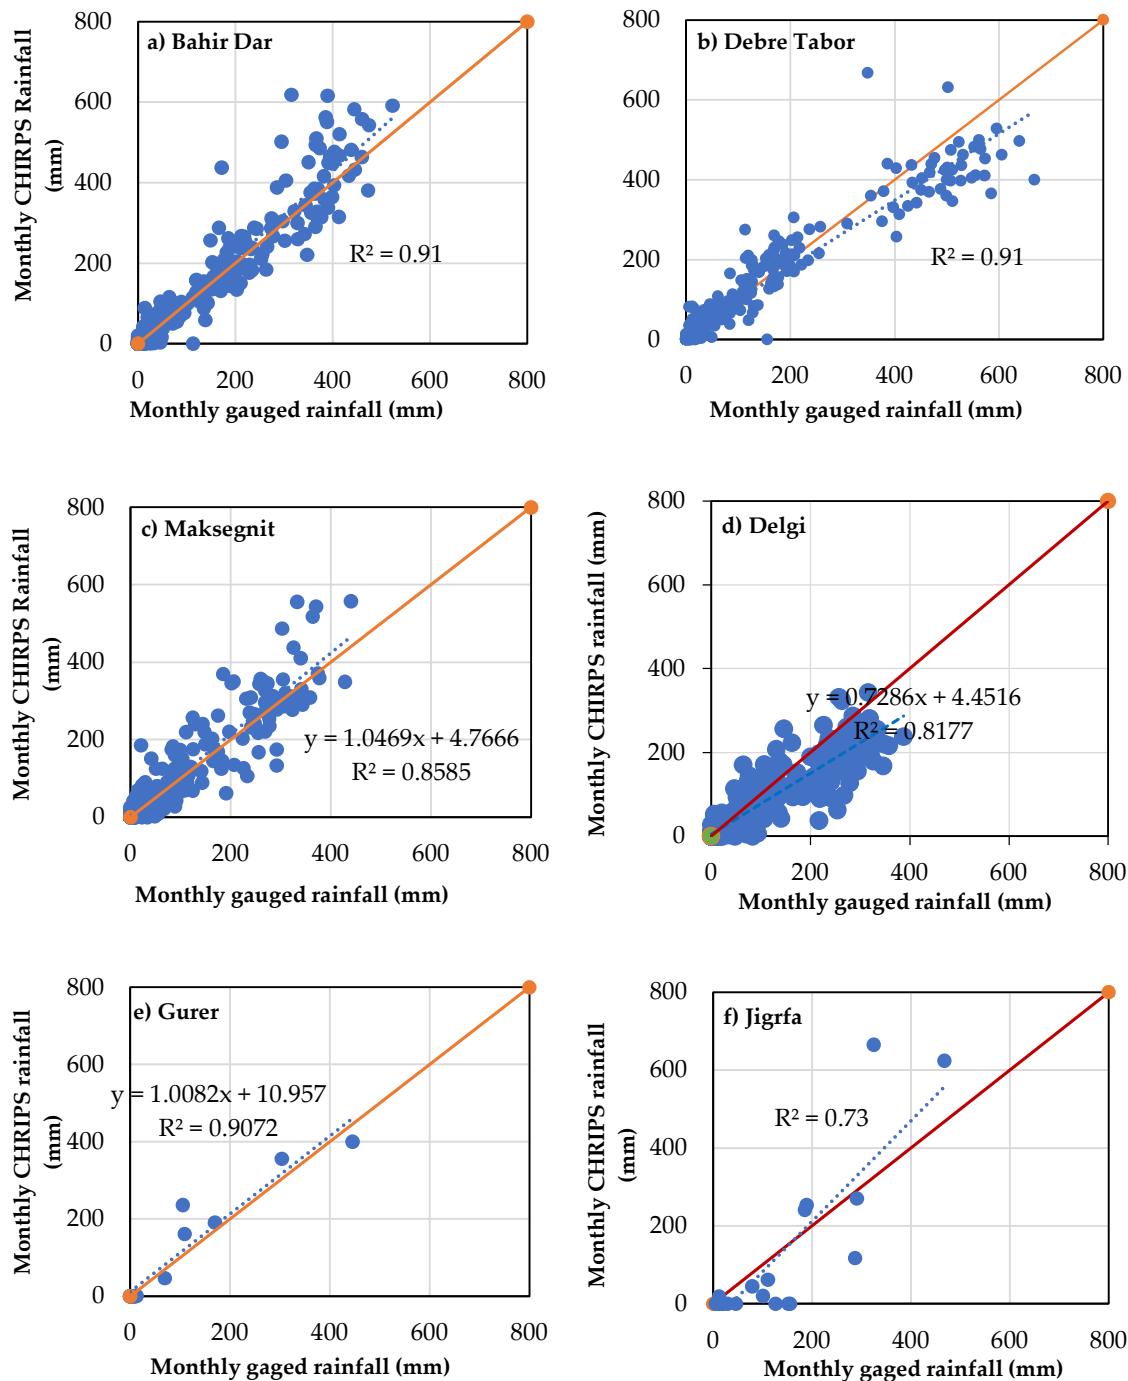

| | Evaporation (mm a ⁻¹) | | land-based | | | Lake+land-based | | |
|-----------|-----------------------------------|-------------------------------------|------------|-------|-------|-----------------|-------|-------|
| | | | 1426 | 1650 | 1789 | 1426 | 1650 | 1789 |
| 1990-1995 | a | km ³ month ⁻¹ | 1.78 | 1.76 | 1.75 | 1.75 | 1.73 | 1.72 |
| | b | | -0.11 | -0.05 | -0.01 | -0.12 | -0.06 | -0.02 |
| | R ² | | 0.91 | 0.91 | 0.91 | 0.92 | 0.91 | 0.91 |
| 1996-2002 | a | km ³ month ⁻¹ | 1.90 | 1.89 | 1.88 | 1.84 | 1.82 | 1.81 |
| | b | | -0.16 | -0.09 | -0.06 | -0.16 | -0.10 | -0.06 |
| | R ² | | 0.88 | 0.88 | 0.88 | 0.89 | 0.88 | 0.88 |
| 2003-2007 | a | km ³ month ⁻¹ | 2.19 | 2.17 | 2.16 | 2.15 | 2.13 | 2.12 |
| | b | | -0.25 | -0.19 | -0.15 | -0.25 | -0.19 | -0.15 |
| | R ² | | 0.94 | 0.94 | 0.94 | 0.95 | 0.94 | 0.94 |

18

20 Table S4: Performance evaluation results with three parameters for the land-based and lake+land-based precipitation and evaporation 1426 mm a⁻¹, 1650 mm a⁻¹ and 1789 mm a⁻¹.

| Evaporation (mm a⁻¹) | Land-based | | | Lake+land-based | | |
|--|-------------------|-------------|-------------|------------------------|-------------|-------------|
| | 1426 | 1650 | 1789 | 1426 | 1650 | 1789 |
| NSE | 0.76 | 0.69 | 0.84 | 0.98 | 0.98 | 0.98 |
| R ² | 0.89 | 0.86 | 0.92 | 1.00 | 1.00 | 1.00 |
| RMSE | 0.44 | 0.56 | 0.33 | 0.09 | 0.09 | 0.09 |

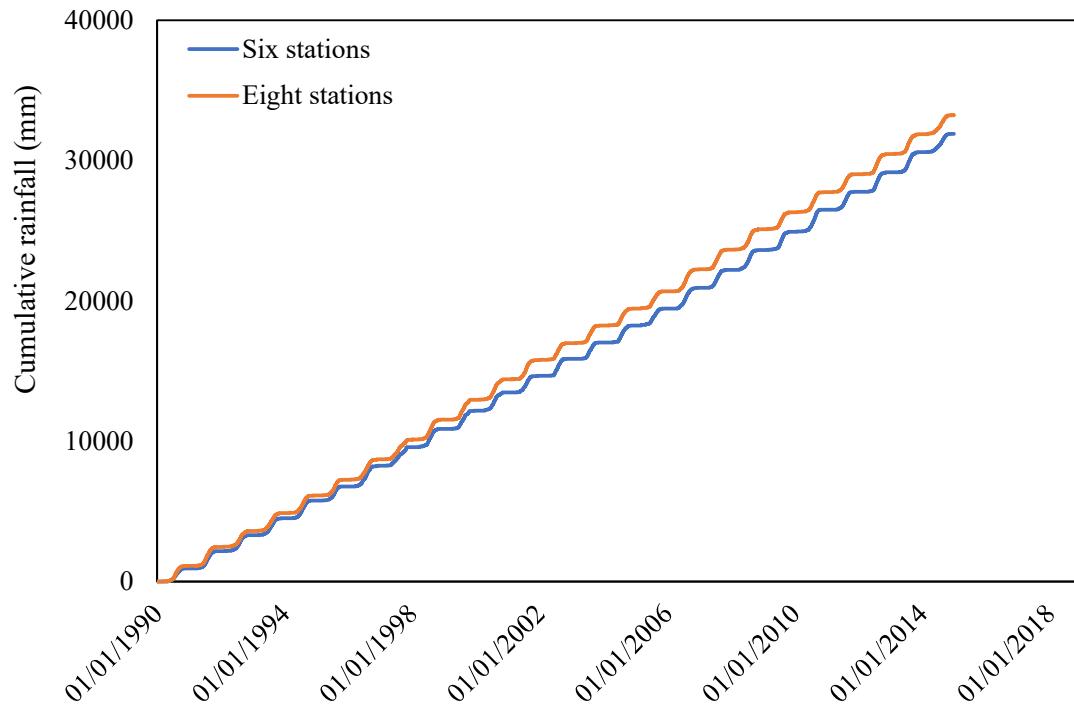

22

24

Figure S1: Correlation between gauged and CHIRPS rainfall data: a) Bahir Dar gauged rainfall vs. CHIRPS, b) Debre Tabor gauged rainfall vs. CHIRPS rainfall estimate, c) Maksegnit gauged rainfall vs. CHIRPS rainfall estimate d) Delgi gauged rainfall vs. CHIRPS rainfall estimate, e) Gurer gauged rainfall vs. CHIRPS rainfall estimate, f) Jigrifa gauged rainfall vs. CHIRPS rainfall estimate.

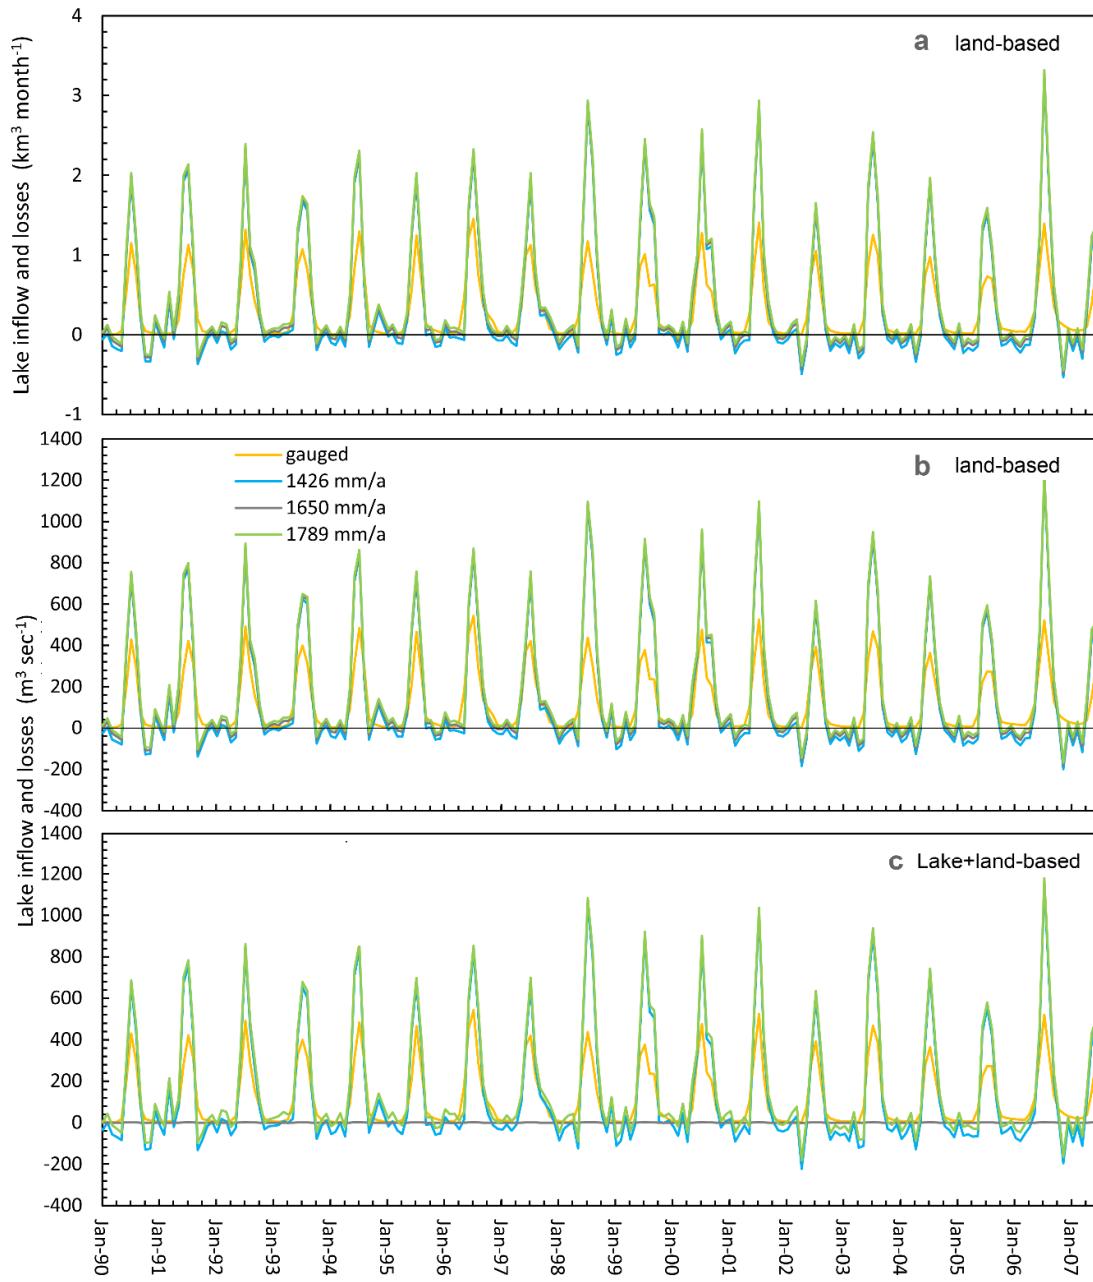

26

28

Figure-S2: Cumulative areal rainfall estimated using the land-based stations and previous station land and lake-

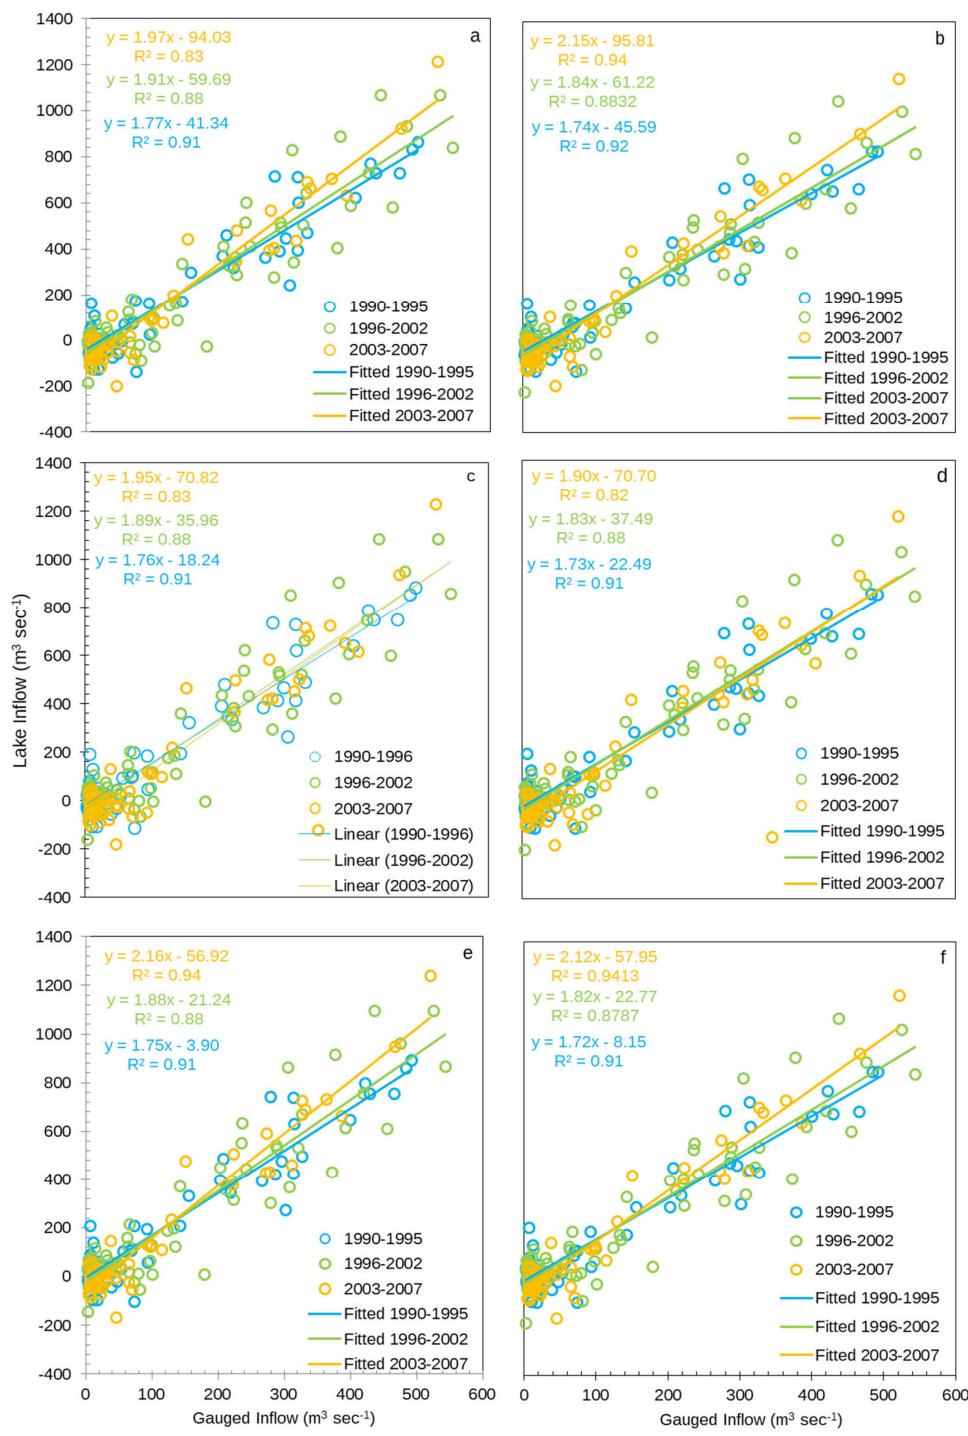

30 based stations

32

Figure S3: Comparison of Lake inflow and losses based on land-based (a & b) and lake + land-based (c) rainfall corresponding to three evaporation values

34

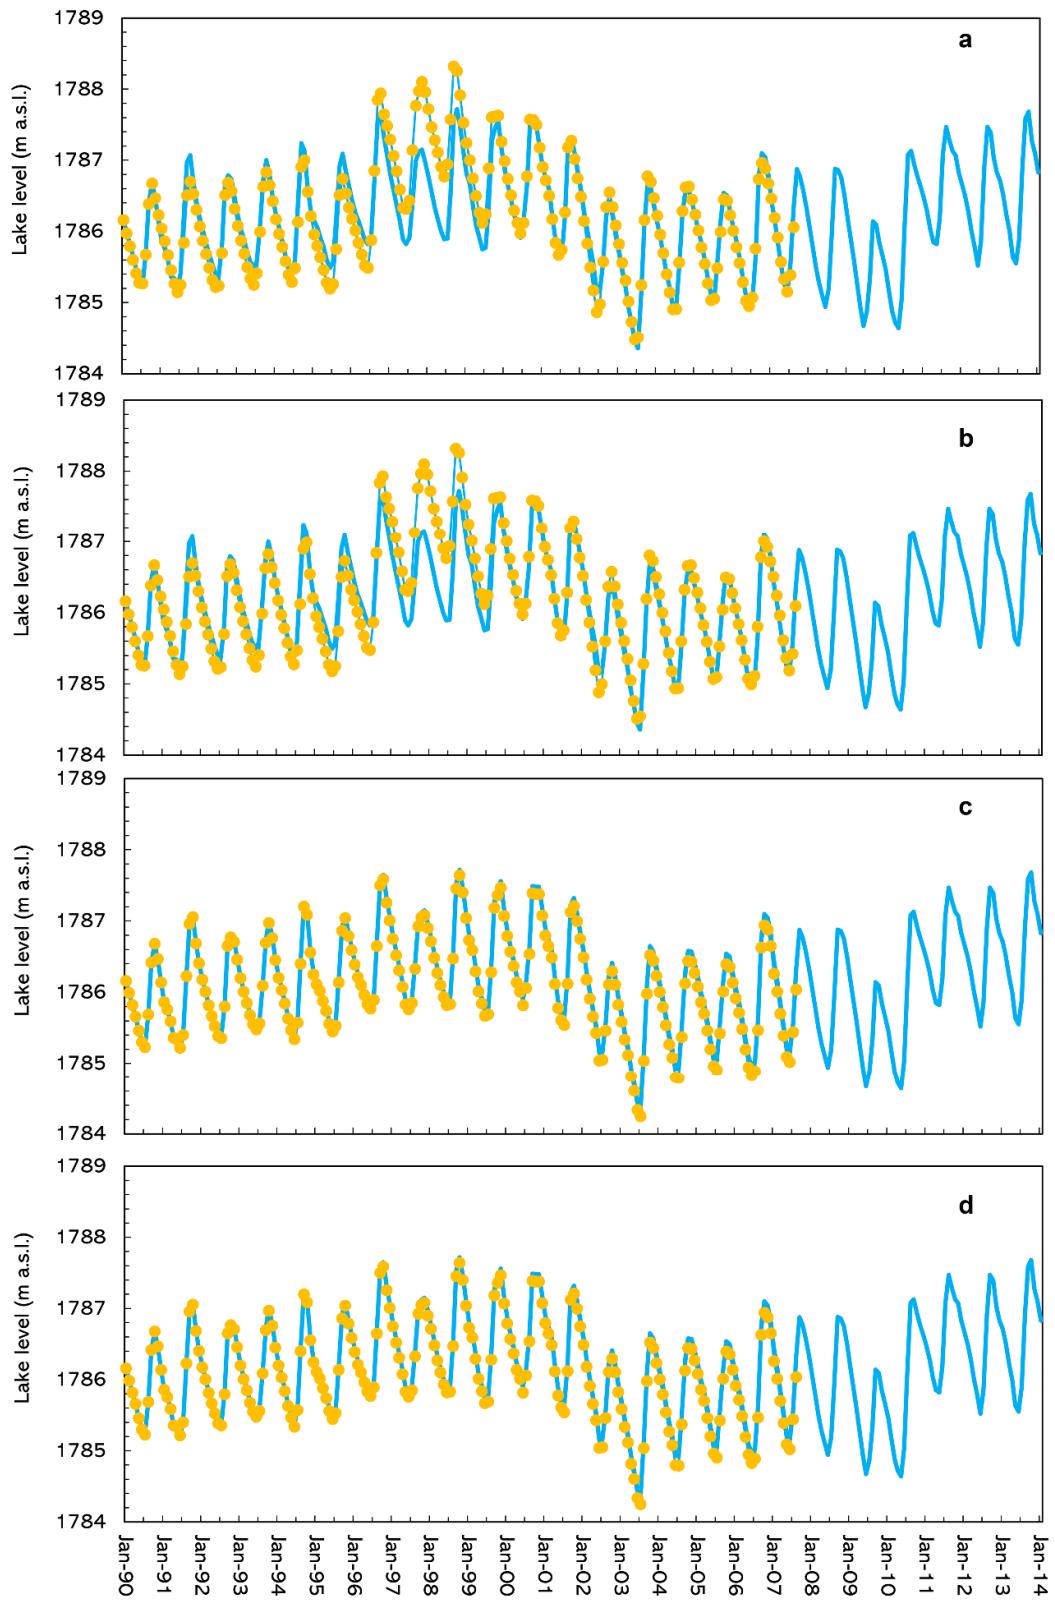

36

Figure S4: Regression of lake inflow and losses with the discharge ($\text{m}^3 \text{ Sec}^{-1}$) of the four gauged watersheds - Gilgel Abay, Gumara, Rib and Megech for precipitation based on land-based rain gauges (a, c, e), lake+land-based rain gauges (b, d, f) and lake evaporation rates of 1426 mm a^{-1} (a, b); 1650 mm a^{-1} (c, d) and 1789 mm a^{-1} (e, f)

38

40

42

Figure S5: Water level predictions (yellow dots) of Lake Tana with rainfall based on land-based stations (a,b), lake + land-based stations (c,d) corresponding to evaporation 1426 mm a^{-1} (a,c), and 1789 mm a^{-1} (b,d). The blue line is the observed lake water level
