Table S2: Reasons for Exclusion

Author, year	Title	Reason for exclusion
Aleksandrov et al., 2020	Reconstruction of fingers using skin-bone grafts with microvascular anastomoses	Wrong intervention
Brown, 1973	The management of phalangeal and metacarpal fractures	Wrong intervention
Bruner, 1957	Use of single iliac-bone graft to replace multiple metacarpal loss in dorsal injuries of the hand	Wrong intervention

Cherkashin, 1964	Replacement of metacarpal defects by the end section of the metatarsus	Other language
Chin and Vedder, 2008	MOS-PSSM CME article: Metacarpal fractures	Wrong intervention
Cooke et al., 1973	The fracture mechanics of bone – another look at composite modeling	Wrong population
Del Pinal and Innocenti., 2007	Evolving concepts in the management of the bone gap in the upper limb. Long and small defects	Review
D’Orio et al., 2023	A functional “metacarpal-hand” after a firework injury obtained without any flap or toe-transfer	Wrong intervention
Dy, 2020	What’s New in Hand and Wrist Surgery	Wrong publication type
Ebrahimzadeh and Jupiter, 2007	Isolated Tuberculosis of a Metacarpal Bone in a 2-year-old child	Wrong publication type
Evans et al., 2008	The use free, mainly cancellous bone grafts for reconstruction of phalanges and metacarpal bones following tumour resection	Wrong intervention
Fallah et al., 2011	Miniplating of metacarpal fractures: An outcome study	Other language
Fontaine et al., 2010	Osseous vascular anatomy in the hand and wrist	Other language
Gajendran and Malone., 2015	Management of complications with hand fractures	Review
Gonzalez, 2007	Locked Intramedullary Nailing of Metacarpal Fractures Secondary to Gunshot Wounds	Wrong publication type
Gonzalez et al., 1993	Low-velocity gunshot wounds of the metacarpal: Treatment by early stable fixation and bone grafting	Wrong intervention
Hammert, 2011	Treatment of Nonunion and Malunion Following Hand Fractures	Review

Henneieng et al., 1962	Repair of loss of metacarpal substance with the aid of iliac grafts	Other language
Hsu et al., 2018	Chimeric medial femoral condyle osteocutaneous flap for reconstruction of multiple metacarpal defects	Review
Huffman and Rayan, 2011	Thumb metacarpophalangeal arthrodesis with local bone grafting	Wrong population
Innocenti et al., 2006	The use of allografts in hand surgery	Other language
Jamini et al., 2010	Reconstruction of the second metacarpal bone with a free vascularized scapular bone flap combined with nonvascularized free osteochondral grafts from both second toes: A Case Report	Wrong intervention
Jones Jr et al., 2012	Free vascularized medial femoral condyle autograft for challenging upper extremity nonunions	Review
Jupiter et al., 2007	Posttraumatic reconstruction in the hand	Wrong intervention
Kettelkamp, 1972	Experimental autologous joint transplantation	Wrong population
Kettlekamp and Ramsey, 1971	Experimental and clinical autogenous distal metacarpal reconstruction	Wrong population
Kolaityte et al., 2022	Intra-medullary Cannulated Headless Compression Screw for Bone Graft Fixation in Metacarpal Fractures	Wrong intervention
Kremer et al., 2006	Outcome Assessment after reconstruction of complex defects of the forearm and hand with osteocutaneous free flaps	Wrong intervention
Lee et al. 2000	Reconstruction of composite metacarpal defects using a fibula free flap	Wrong intervention

Moris et al., 2016	Functional and radiographic evaluation of the treatment of traumatic bone loss of the hand using the Masquelet technique	Wrong intervention
Murata, 2015	Vascularized bone grafts to the upper extremities	Full-text not found
Nanno et al., 2007	Dorsal fracture dislocations of the second and third carpometacarpal joints	Wrong publication type
Nathan and Chatterjee, 2005	Silastic replacement of metacarpal after resection of giant cell tumor. A case report	Wrong publication type
Omokawa, 2006	The anatomical basis for reverse first to fifth dorsal metacarpal arterial flaps	Wrong publication type
Picardo et al., 2021	Iliac crest bone grafting for metacarpal bone defects using bridging bone block	Wrong publication type
Poitevein, 2002	Trephine bone grafting technique	Wrong intervention
Ring, 2006	Malunion and nonunion of the metacarpals and phalanges	Review
Rodriguez et al., 2022	Free medial femoral condyle flap for phalangeal and metacarpal bone reconstruction	Wrong intervention
Shipachev, 1958	Metacarpal bone graft in reconstruction of the fingers and hand	Other language
Singh et al., 2013	Percutaneous autologous bone marrow injections for delayed or non-union of bones	Wrong intervention
Soucacos et al., 2006	Vascularized bone grafts for the management of non-union	Review
Suematsu et al., 1987	Postoperative course of patients treated with iliac osteocutaneous free flaps. A two-to five-year follow-up study	Wrong intervention

Verega, 2017	Associated bone and soft tissue defects of the hand solved with vascularized bone plastys	Wrong intervention
Williams and Lochner, 2013	Pediatric hand and wrist injuries	Wrong intervention
Yajima et al., 1999	Free vascularized fibula grafts in surgery of the upper limb	Wrong intervention
Yong et al., 2007	Trapezoid rotational bone graft osteotomy for metacarpal and phalangeal fracture malunion	Wrong intervention

Table S4: Study Characteristics

Study	Year	Study Type	Funding Source	Country	Purpose/Aim
Aguilera et al.	2022	Retrospective Case Series	None	Spain	Describe an original technique with a fixation method for the treatment of metacarpal non-union and report a series of three cases.
Akmaz et al.	2004	Prospective Cohort	None	Turkey	Evaluate the treatment approach and functional outcomes of surgical reconstruction performed on individuals who have sustained metacarpal shaft defects as a result of gunshot wounds.
Anderson et al.	2022	Case Report	None	USA	Act as an educational tool for the rising reconstructive surgeon explaining the ‘when, why and how’ for perioperative management.
Christen et al.	2022	Prospective Cohort	Yes	Switzerland	Investigate the osteogenic capacity, the advantages, and the outcome of free periosteal-only medial femoral condyle flaps in patients with metacarpal non-union with impaired bone vascularization.
Cogsil et al.	2022	Retrospective Case Series	None	USA	Describe a new surgical technique using an iliac crest "top hat" bone graft to treat refractory metacarpal for when initial surgical treatment of metacarpal non-union is unsuccessful.

Deng et Al.	2020	Case Report	None	China	Summarize the current application of vascularized small bone grafting for fracture non-union and bony defects.
Doi and Sakai	1994	Case Report	NR	Japan	Describes clinical applications of the vascularized periosteal bone graft to treat patients with fracture non-union.
Ebraheim et al.	1997	Case Report	NR	USA	Report the use of an AO mini fixator and autogenous iliac crest graft for segmental defects of the metacarpals.
Erçin et al.	2022	Retrospective Cohort Study	None	Turkey	Present adipofascial and periosteal tissue technical modifications and results for MFC free flap monitoring.
Ferguson and Bogoch	1999	Case Report	NR	Canada	Describe the case of an unusual seronegative monoarthropathy of the right wrist and who was treated with fusion by the method of Clayton.
Ireland and Taleisnkik	1986	Case Report	NR	USA	Present cases, review the literature on the subject, and discuss factors that contributed to the development of delayed and non-unions.
Jupiter et al.	1985	Retrospective Cohort Study	NR	USA	Review a consecutive series of 25 phalangeal and metacarpal non-union and delayed unions.

Milhoan et al.	2022	Case Report	None	USA	Present a technique for managing metacarpal bone loss utilizing a tri-cortical iliac crest graft and an intramedullary metacarpal nail for the treatment of metacarpal fractures and non-union.
Sakai et al.	1988	Case Report	NR	Japan	Describe a new vascularized thin corticoperiosteal graft harvested from the medial condylar and supracondylar areas of the femur.
Tsai et al.	1981	Case Report	NR	USA	Describe nine instances of combined second and third toe-to-hand transfers for severe transmetacarpal mutilating hand injuries.
Vegas et al.	2012	Prospective cohort	NR	Spain	Evaluate the efficacy of periosteal-only transfers from the medial femoral condyle in the treatment of recalcitrant non-unions.
Wei et al.	1999	Case Report	NR	Taiwan	Present experiences in bilateral metacarpal hand reconstruction with multiple-toe transplantations in a series of six patients
Zargarbashi et al.	2018	Case Report	None	Iran	Present a two-year-old boy with a non-union of metacarpal fractures, treated with open reduction/internal fixation and bone graft.

NR: Not reported

Table S5.1: Patient Characteristics

Study	N	Sex	Mean Age (Range)	Initial Injury	Initial Interventions	Affected Metacarpal	Time from injury
Aguilera et al. (2022)	4	M: 3 F: 1	44.5 (29-73)	M1: Oblique long comminuted and deviated fracture	M1: ORIF, then cast M2: Internal fixation M3: ORIF F: Conversative	M1: 3rd metacarpal	M1: 3.5 m
				M2: Short oblique fracture		M2: 3rd metacarpal	M2: 6 m
