Table S1. The levels of the main effects (sample, panelist, and session) and interaction effects (sample by session, panelist by sample, and session by panelist) by a three-way ANOVA: A) without the nose clip and B) with the nose clip. Statistically significant differences presented: ***P < 0.001, ** < 0.01, *P < 0.05.

A)		Thickness		Stickiness		Melting sensation		Sweetness		Grain-like flavor		Aroma intensity	
	df	F-value	p	F-value	p	F-value	p	F-value	p	F-value	p	F-value	p
Session	3	0.710	0.547	0.642	0.589	1.771	0.154	1.577	0.196	1.452	0.229	0.573	0.633
