Deadline for manuscript
submissions:

15 June 2024

Message from the Guest Editors

Dear Colleagues,

Metasurfaces pervade wireless communications via their expressions in multiple-input multiple-output (MIMO), millimeter wave and terahertz, full-duplex, edge computing, non-orthogonal multiple access, cognitive radio, physical layer security, backscatter, simultaneous wireless information and power transfer (SWIPT), localization, etc. Depending on whether radio frequency (RF) chains are involved or not, metasurfaces can be divided into two categories: active and passive metasurfaces. Typical examples of the difference include passive intelligent reflection surface (IRS)/ reconfigurable intelligent surface (RIS) and active holographic metasurfaces. Currently, metasurfaces are primarily used to reconfigure wireless environments or to act as transceivers. Accompanying these applications, however, is the skyrocketing difficulty of hardware overheads, computational complexity, power consumption, interference management, etc. Conversely, the potential of metasurfaces remains effectively unrealized. New related technologies or applications deserve to be explored, such as microwave/ RF QR code, RF neural network, holographic imaging, etc.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
