### Message from the Guest Editors

Dear Colleagues,

The Special Issue aims at synthesizing current knowledge, highlighting modern and disruptive approaches for monitoring and mapping land systems changes. We are interested in contributions that link the aforementioned cornerstones through either empirical research or conceptual/theoretical works that:

- analyze, map and characterize land-use/cover changes with new methods;
- monitor anthropogenic pressures in land systems;
- propose new ways of using big data, artificial intelligence and new technology for analyzing land systems.

Contributions at the intersection of land use science, landscape sustainability science and environmental governance are especially welcome, but contributions from other related fields at the local, regional and global scale are also highly welcome.

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
