

SUPPLEMENTARY MATERIAL

Table S1. Detected volatile organic compounds (VOCs) and concentrations, measured by the Purge-and-Trap-gas chromatography-mass spectrometer (PT-GC-MS) equipment of the chlorinated-solvent-polluted aquifer, in Besòs groundwater (GW). Transport blank (TB), field blank (FB), and monitoring well (MW). Limits of detection (LOD) and quantification (LOQ) of VOCs analysed by PT-GC-MS and headspace solid-phase microextraction gas chromatography electron capture detector (SPME-GC-ECD). All values are expressed in µg/L.

#	Compound	PT-GC-MS						PT-GC-MS		SPME-GC-ECD	
		TB	FB	Well	MW_2	MW_6	MW_14	LOD	LOQ	LOD	LOQ

Table S4. Concentration ($\mu\text{g/L}$) of chlorinated solvents in unspiked and spiked (10 $\mu\text{g/L}$) real GW samples at 0 and 5 h of incubation time, detected by SPME-GC-ECD, and their removal rates (%). No removal (N.R.) quantified since DCE was undetected in unspiked GW at 0 or 5 h.

	Concentration ($\mu\text{g/L}$)				Removal (%)	
	Spiked GW	Spiked GW	Unspiked GW	Unspiked GW	Spiked GW	Unspiked GW
	0h	5h	0h	5h	5h	5h
DCE	3.6 \pm 0.3	1.8 \pm 0.5	< LOD	< LOD	49.9 \pm 3.5	N.R.
TCE	14.7 \pm 0.3	< LOD	5.2 \pm 1	0.3 \pm 0.1	99.8 \pm 0.2	93.9 \pm 6.4
PCE	12.7 \pm 0.9	5.3 \pm 0.2	5.9 \pm 0.9	1.6 \pm 0.3	58.3 \pm 1.3	72.9 \pm 6.3

Table S5. Log Octanol-Water Partition Coefficient (Log K_{ow}) of studied compounds.

Compounds	Log K_{ow}	Ref
Cis-1,2-dichloroethylene	1.86	[30]
Tetrachloroethylene	3.40	[30]
Trichloroethylene	2.29	[30]

Table S6. Literature review of chemical reagents and their reported removal yield with chlorinated solvents. Persulfate (PS), nano zero-valent iron (nZVI), cis-1,2-dichloroethylene (DCE), trichloroethylene (TCE), and tetrachloroethylene (PCE).

Treatment	Monitored molecules	Reported removal	Type of experiment	pH	Temperature	Type of water	Reference
PS	TCE	< 30% removal.	Batch experiments in 40 mL septum sealed vials, duration: 16 h.	Final pH 6.2	20 °C	Synthetic water spiked with 50 or 375 mg/L TCE and a molar ratio of TCE: PS of 1:20.	[34]
Fe(VI)	TCE	Maximum removal with ultrapure water at pH 7: 97%. Maximum removal with real water at pH 7 (containing dissolved organic carbon): 42%.	Batch experiments with 10 mL containing solution in 20 mL septum sealed vials, duration: 30 min.	Initial pH 3, 5, 7, 9 or 11	Not reported	Ultrapure water or real GW spiked with 0.1-10 mg/L of TCE and with Fe(VI) at 50 mg/L.	[8]
nZVI	TCE, PCE and DCE	Removal generally >80% for each of these molecules depending on the pilot test and on the type of employed nZVI.	Full-scale experiments.	Real conditions	Real conditions	Unspiked real water.	[22]
PS+Fe(II)	TCE	Nearly 100% removal.	Batch experiments in 60 mL glass reactors, duration: 1 h.	Final pH around 3	20 °C	Synthetic water spiked with 60 mg/L TCE and a molar ratio of PS:Chelate:Fe(II):TCE molar ratio of 20:2:10:1.	[33]
	PCE	Complete removal.	Batch experiments in 250 mL glass reactors, duration: 30 min.	Initial pH of 3	20 °C	Synthetic water spiked with 0.015 mmol/L PCE and a molar ratio of PS:Fe(II):Hydroxylamine:PCE molar ratio of 30:4:20:1.	[43]
PS+nZVI	TCE	> 95% removal.	Batch experiments in 40 mL septum sealed vials, duration: 16 h.	Final pH 2.6	20 °C	Synthetic water spiked with 50 or 375 mg/L TCE and a molar ratio of TCE: PS: nZVI of 1:20:150.	[34]
PS + S-nZVI	DCE, TCE and PCE	93 – 133 %	Batch experiments in 70 mL glass reactors, duration: 0.9 - 300 h	Not reported	Not reported	S-nZVI (Fe content: 81.6 %; S/Fe molar ratio: 99.95:0.05) concentration: 1.36 – 33.9 mmol/g	[26]
	TCE	97-99 % removal	Batch experiments in 250 mL glass reactors, duration: 60 min	3, 5, 7, 9, 11	Not reported	Synthetic groundwater with PS: 4 mM; S-nZVI: 250 mg/L TCE: 1.5 mM	[35]

Table S7. Human health (hazard quotient (HQ), cancer risk (CR)) and environmental (risk quotient (RQ)) risk assessment parameters obtained necessary for calculations. * According to the Agency for Toxic Substances and Disease Registry, there is inadequate information to assess the carcinogenic potential of cis-1,2-dichloroethylene (DCE).

			DCE	TCE	PCE
Human health	Non-cancer risk	RfD	2.0E-03	5.0E-04	6.0E-03
	Cancer risk	CSF	*	4.6E-02	2.1E-03
Environmental		PNEC Fw	6.8	10.0	10.0
