1. Supplementary Tables

Table S1: Physiological and biochemical test results of stain DN-1.

Experimental Projects	Results	Experimental Projects	Results	Experimental Projects	Results
Catalase from <i>Micrococcus lysodeikticus</i>	-	Sucrose	+	Fibrous disaccharides	+
Hydrogen sulfide production	-	xylose	W	raffinose	-
Gelatin liquefaction	-	Maltose	+	arabinose	+
Indole production	-	trehalose	-	rhamnose	-
Nitrate reduction	-	mannose	W	sorbitol	-
Glucose	+	Sorbitol	-	Hesperidin	+

+ indicates a positive reaction, - indicates a negative reaction, and W indicates a weak positive reaction.
