

**Supplementary figure:** A summary of the comparison between the groups treated with CBD and THC.

A) The number of proteins that were down-regulated (in blue) and up-regulated (in red) in each treatment group compared to the control group treated with MeOH. B) The number of proteins that were shared or distinct between the different treatment groups. C) A visualized PPI network of the down-regulated (in blue) and up-regulated (in red) proteins from the CBD (in green), THC (in blue), and shared DEPs (in pink) between both groups using Cytoscape.
