Field Magnet Resonance Center,
Medical University of Vienna,
Spitalgasse 23, A-1090 Vienna,
Austria

Message from the Collection Editor

During the last decade, massive progress was made in the field of human neuromodulation in relation to ultrasound. Ultrasound techniques allow unprecedented precision in targeting brain areas. Ultrasound techniques are also the first to allow non-invasive deep brain stimulation. The first clinical data show that novel add-on therapies with ultrasound neuromodulation are possible. The complete field of human-navigated ultrasound brain stimulation represents cutting-edge research. The aim and scope of the collection are to overview state-of-the-art human ultrasound neuromodulation.

Very short reviews from different groups working on topics relevant for human ultrasound neuromodulation are welcomed. Reviews should summarize the current state of the laboratory data with respect to neuroscientific and clinical ultrasound neuromodulation.

an Open Access Journal by MDPI

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
