Advanced Technologies in Antennas and Their Applications

Guest Editors:

Dr. Nengwu Liu

Dr. Zhongxun Liu

Dr. Gang Zhang

Dr. Zhe Chen

Dr. Gengqi Zheng

Deadline for manuscript submissions:
30 September 2024

Message from the Guest Editors

This Special Issue mainly focuses on advanced antenna technologies and their wide range of applications, aiming to illustrate the working principle of these antennas and investigate the latest advanced technologies for the realization of high performance, i.e., wide bandwidth, low profile, high gain, wide beamwidth, 3D printing, and so on. Topics of interest include, but are not limited to: 5G and B5G antennas for terminal as well as base stations; filtering antennas; 3D printing antennas; array/MIMO antennas; artistic and hidden antennas; decoupling for multi-port antennas; meta-material/ metasurface; phased array antennas; and RFID Base Station Antennas and Systems.

Special Issue

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2(*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
