Deadline for manuscript  
submissions:

**31 December 2024**

### Message from the Guest Editors

Dear Colleagues,

With the development of the aquatic feed industry, new feedstuff and feed additives have been developed, but their roles on the growth and immunity of different aquaculture animals remain to be examined. In addition to essential nutrients, feedstuffs and feed additives must contain some biologically active constituents to support fish growth and wellness. However, some also have adverse effects on growth performance due to the introduction of undesirable materials. This Special Issue focuses on the impacts of applying feedstuffs and additives on the growth and immunity of aquaculture animal, especially the recently developed feedstuff and additives.

Dr. Qiyou Xu

## Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubAg](#), [FSTA](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Marine & Freshwater Biology*)
