Wildlife Ecology and Conservation in Forest Habitats

Guest Editors:

Dr. Alexey Andreychev

Department of General Biology
and Ecology, Faculty of
Biotechnology and Biology,
National Research Mordovia
State University, Bolshevistskaya
Str. 68, Saransk 430005, Russia

Dr. Todd Fredericksen

School of Natural Sciences and
Mathematics, Ferrum College,
Ferrum, VA 24088, USA

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

Ecology and wildlife conservation in forest habitats is very interesting. This research topic can be considered as multifunctional connections of organisms in the perspective of their conservation. The variety and peculiarities of research methods allow us to properly study the ecological connections of animals and plants with other organisms. These approaches rely on biodiversity and types of relationships to solve global natural problems, while simultaneously providing environmental, social, and economic prospects and helping to increase the sustainability of forest ecosystems. However, for the effective protection of wildlife, it is necessary to introduce new approaches and update existing views in order to eliminate several gaps in research. This Special Issue welcomes studies containing new data and methods related to quantification in the conservation of entire natural complexes or individual species in natural forest or suburban habitats. Original research and reviews aimed at understanding the key characteristics of forest communities that contribute to obtaining numerous advantages, potential limitations, and trade-offs in wildlife conservation are especially welcome.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
