Structure and Species Composition of Forests – Prospects and Challenges for Adaptive Forest Management

Guest Editors:

Dr. Ion Catalin Petritan

Department of Forest
Management Planning and
Terrestrial Measurements,
Faculty of Silviculture and Forest
Engineering, Transilvania
University, Șirul Beethoven 1,
ROU-500123 Brasov, Romania

Prof. Dr. Jarosław Paluch

Faculty of Forestry, Agricultural
University Krakow, aleja Adama
Mickiewicza 21, 31-120 Kraków,
Poland

Deadline for manuscript
submissions:

closed (31 May 2024)

Message from the Guest Editors

Forests are facing natural and anthropogenic hazards on an unprecedented scale. Therefore, one of the most urgent challenges for forestry is to integrate measures undertaken for adapting to climate change and for mitigating the loss of natural biodiversity and to manage the consequences of these measures for society and local economies. Responding to this challenge requires the active role of all stakeholders in the forestry sector and the exchange of ideas and experiences. Nonetheless, solutions proposed from a local perspective have the potential to inspire planners and forest managers working with ecosystems formed by the same functional groups of species under similar natural hazards or climate change scenarios. Scientific papers from around the world dealing with examples of resilient forest structures from managed and natural forests, silvicultural techniques of adaptive forest management, hazard risk analyses, and the consequences of implemented solutions for commodity and non-commodity forest services are welcome.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
