Deadline for manuscript
submissions:

closed (10 March 2024)

Message from the Guest Editor

Connective tissue diseases are a field in which most of the evidence described, regarding diagnosis and treatment, is scant and based mainly on very few randomized studies, case series, or, for the rarest diseases, isolated clinical cases. For all of these reasons, before beginning clinical trials or studies with a higher degree of evidence, it is necessary to know the state of knowledge through systematic reviews or meta-analyses. For this reason, I consider the possibility that this type of work can contribute to the scientific community to be very high, and more so in specific fields that are so infrequent within connective tissue diseases such as autoinflammatory syndromes, some types of immune-mediated inflammatory myopathies, or even responses to certain drugs in rare diseases. All of this is to give some examples. For all of the aforementioned reasons, we invite authors to send their articles related to these topics.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
