Deadline for manuscript submissions:

**closed (29 February 2024)**

### Message from the Guest Editors

Dear Colleagues,

Laser processing and additive manufacturing are revolutionary techniques for the advanced manufacturing of a broad range of materials, especially metallic materials used in structural applications. This Special Issue aims to provide a platform for appreciating state-of-the-art advances, inspiring and promoting the new development and applications of laser processing and the additive manufacturing of metallic materials. Topics include but are not limited to the following areas:

- Laser welding;
- Laser cladding;
- Laser cutting;
- Laser-arc hybrid welding and additive manufacturing;
- Laser-based additive manufacturing;
- Wire arc additive manufacturing (WAAM);
- Electron beam-based additive manufacturing;
- Modelling and simulation of laser processing and additive manufacturing;
- AI and machine learning for laser processing and additive manufacturing;
- Monitoring and control of laser processing and additive manufacturing;
- Quality inspection of laser processing and additive manufacturing;
- Micro and nano laser welding and additive manufacturing.

## Editors-in-Chief

### **Prof. Dr. Hugo F. Lopez**

Department of Materials Science  
and Engineering, College of  
Engineering & Applied Science,  
University of Wisconsin-  
Milwaukee, 3200 N. Cramer  
Street, Milwaukee, WI 53211, USA

### **Prof. Dr. Yong Zhang**

Beijing Advanced Innovation  
Center of Materials Genome  
Engineering, State Key  
Laboratory for Advanced Metals  
and Materials, University of  
Science and Technology Beijing,  
30 Xueyuan Road, Beijing 100083,  
China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **Inspec**, **CAPLUS / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
