## Advances in Preparation Methods and Numerical Simulation of Composites: Formation and Properties

Guest Editors:

**Prof. Dr. Zhengyi Jiang**

School of Mechanical, Materials,  
Mechatronic and Biomedical  
Engineering, University of  
Wollongong, Wollongong, NSW  
2522, Australia

**Prof. Dr. Hongmei Zhang**

School of Material and  
Metallurgy, University of Science  
and Technology Liaoning,  
Anshan 114051, China

Deadline for manuscript  
submissions:

**10 June 2024**

### Message from the Guest Editors

Advanced composite materials are lightweight and high strength and have designable performance. Further advantages include their heat insulation, heat conduction, vibration reduction, high (low) temperature resistance, corrosion resistance, and wave transmission and absorption. The composites are widely used in aerospace, transportation, energy, and chemical industries, as well as in construction, textiles, sports, and medical treatment, and have played an important role in the development of modern science and technology and the renewal and upgrading of high-end equipment. Composite materials represent an emerging future with many industrial applications.

This Special Issue intends to cover original research and critical review articles on recent advances in all aspects of metal-metal, metal-nonmetal, and nonmetal-nonmetal composites. In particular, the topics of interest include, but are not limited to the following: Material composition design; The design and manufacturing process; Microstructure and properties; Interfacial diffusion behavior; Microstructure characterization of constituent phases; Physical and chemical properties; Modeling and simulation.

## Editors-in-Chief

### **Prof. Dr. Hugo F. Lopez**

Department of Materials Science  
and Engineering, College of  
Engineering & Applied Science,  
University of Wisconsin-  
Milwaukee, 3200 N. Cramer  
Street, Milwaukee, WI 53211, USA

### **Prof. Dr. Yong Zhang**

Beijing Advanced Innovation  
Center of Materials Genome  
Engineering, State Key  
Laboratory for Advanced Metals  
and Materials, University of  
Science and Technology Beijing,  
30 Xueyuan Road, Beijing 100083,  
China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **Inspec**, **CAPLUS / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
