Message from the Guest Editor

Dear Colleagues,

Pharmacokinetics describes a drug's absorption, distribution, metabolism and excretion and pharmacodynamics describes what a drug does to the body. Those are critical steps to understanding a drug's efficacy and safety. Several intrinsic and extrinsic factors could alter a drug's pharmacokinetic and pharmacodynamics, including other drugs/food and natural products. Drug interactions may increase the action, cause the drug less effective, or have unexpected side effects.

This Special Issue will cover manuscripts that describe the results of basic, translational and clinical research that contribute significant and novel information on pharmacokinetics, pharmacodynamics and drug interactions. Areas include innovative mechanisms, approaches, and modeling and simulation. Original research articles, review articles, or commentaries are welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
