Message from the Guest Editors

Dear Colleagues,

A Special Issue of the journal *Pharmaceutics* will be devoted to the presentation of practical results on the study of new properties of drugs, such as supramolecular complexes and nanoparticles. The main task is to offer a description of the mechanism of action of drugs, not only from the point of view of their ligand–receptor interaction but also the physicochemical, dispersion properties of the surface. There is considerable interest in research on, not only the nanoparticles of iron oxide, copper, zinc, silver, gold, and so on, but also on transport nanosystems and nanosized supramolecular complexes, which determine the development of a pharmacological effect due to long-range surface forces. This direction provides a fundamental basis for solving many scientific and pharmaceutical problems related to the control of the properties of medium and dispersions. The scope is to expand the boundaries of new possibilities for the use of drugs.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
