

Supplemental Table S1. Methylation values of known oncogenes in the WTC-exposed (WTC EHC) cancer-free subjects compared to the unexposed cancer-free subjects (NYUWHS)

Gene	Probe ID	Oncogenes		Methylation Status*	Regulatory Feature
		WTC EHC methylation value, mean	NYUWHS methylation value, mean		
BCL3	cg16632661	0.101	0.068	Higher	NA
BCL6	cg12110155	0.844	0.801	Higher	Promoter
	cg24771349	0.047	0.036	Higher	NA

*Methylation status refers to mean methylation value of the WTC exposed subjects (WTC EHC) relative to mean methylation value of unexposed subjects (NYUWHS).
