## Missing Citation

In the original publication [1], Opping, S. Between Bandura and Giddens: Structuration theory in social psychological research? *Psychol. Thought* 2014, 7, 111–123, was not cited. The citation has now been inserted in Section 3.2. Structuration Theory and should read as follows:

The theory from sociology proposes a bidirectional relationship between structure (environment) and agency (individual), where both can function as the cause and effect of the other (see Figure 6 [56]). Social structures create constraints and opportunities for particular behavior. At the same time, individuals are agents whose behavior creates and transforms social structures.

**Figure 6.** Structuration theory. Reproduced from Opping, S., ‘Between Bandura and Giddens: Structuration Theory in Social Psychological Research?’; published by *Psychological Thought*, 2014 [56].

## Newly Added Reference
