Supplementary material

Figure S1. Risk of bias assessment of randomized clinical trials of the SURPASS program. The assessment was targeted to the primary outcome (mean HbA1c change from baseline for all trials) with an intention-to-treat effect.

Trial name	Study ID	Experimental	Comparator	Outcome	D1	D2	D3	D4	D5	Overall
SURPASS-1	NCT03954834	Tirzepatide	Placebo	Mean HbA1c change from baseline	+	+	+	+	+	+
SURPASS-2	NCT03987919	Tirzepatide	Semaglutide	Mean HbA1c change from baseline	+	+	+	+	+	+
SURPASS-3	NCT03882970	Tirzepatide	DegludecU100	Mean HbA1c change from baseline	+	+	+	!	+	!
SURPASS-4	NCT03730662	Tirzepatide	GlargineU100	Mean HbA1c change from baseline	+	+	+	!	+	!
SURPASS-5	NCT04039503	Tirzepatide + GlargineU100	Placebo + GlargineU100	Mean HbA1c change from baseline	+	+	+	+	+	+
SURPASS-6	NCT04537923	Tirzepatide + GlargineU100	LisproU100 + GlargineU100	Mean HbA1c change from baseline	+	+	+	!	+	!

+ Low risk

! Some concerns

- High risk

D1 Randomization process

D2 Deviations from the intended interventions

D3 Missing outcome data

D4 Measurement of the outcome

D5 Selection of the reported result

Figure S2. Graphical representation of the risk of bias assessment of randomized clinical trials of the SURPASS program. The assessment was targeted to the primary outcome (mean HbA1c change from baseline for all trials) with an intention-to-treat effect.

	Randomization process	Deviations from intended interventions	Missing outcome data	Measurement of the outcome	Selection of the reported result	Overall bias
Assignment to intervention (the 'intention-to-treat' effect)						
Total number of studies = 6						
Low risk	100	100	100	50	100	50
Some concerns	0	0	0	50	0	50
High risk	0	0	0	0	0	0

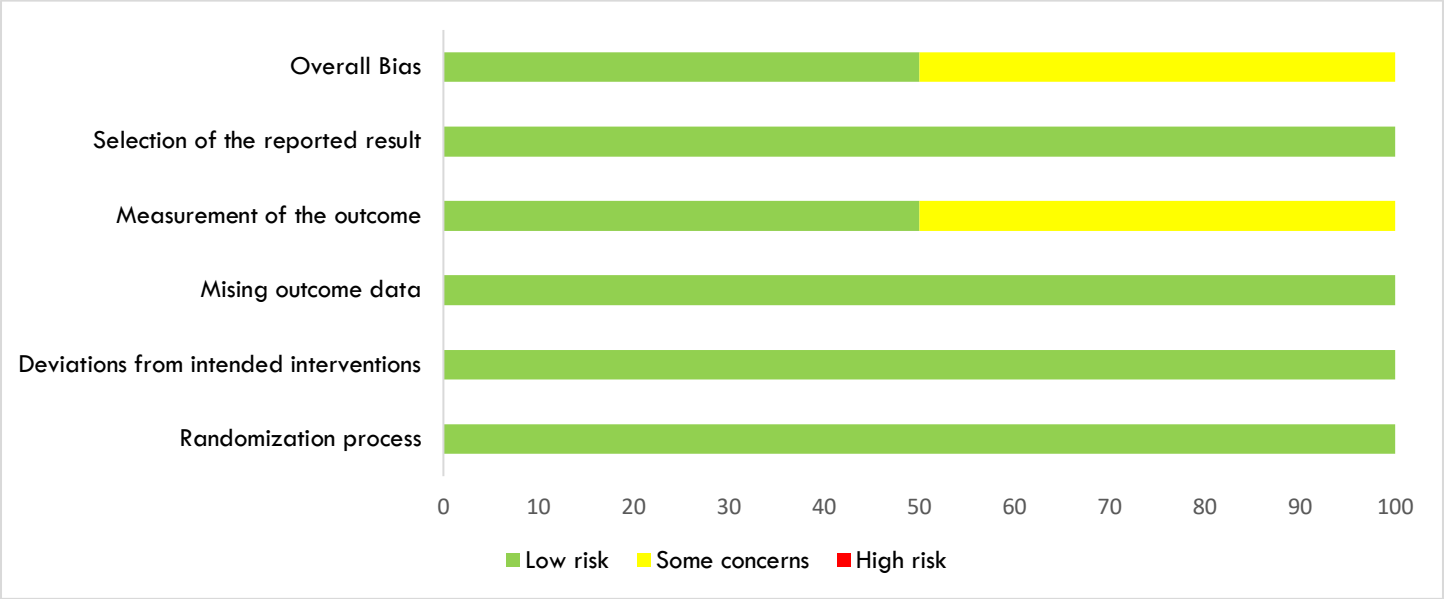

Table S1. Data sheet of the risk of bias assessment of randomized clinical trials of the SURPASS program.

Unique ID	SURPASS-1	**Study ID**	NCT03954834	**Assessor**	GL
Ref or Label		**Aim**	assignment to intervention (the 'intention-to-treat' effect)		
Experimental	Tirzepatide	**Comparator**	Placebo	**Source**	Journal article(s); Trial protocol; Non-commercial trial registry record (e.g. ClinicalTrials.gov record)
Outcome	Mean HbA1c change from baseline	**Results**		**Weight**	1
Bias arising from the randomization process	1.1 Was the allocation sequence random?			Y	
	1.2 Was the allocation sequence concealed until participants were enrolled and assigned to interventions?			Y	
	1.3 Did baseline differences between intervention groups suggest a problem with the randomization process?			N	
	Risk of bias judgement			**Low**	
Bias due to deviations from intended interventions	2.1.Were participants aware of their assigned intervention during the trial?			N	
	2.2.Were carers and people delivering the interventions aware of participants' assigned intervention during the trial?			N	
	2.3. If Y/PY/NI to 2.1 or 2.2: Were there deviations from the intended intervention that arose because of the experimental context?			NA	
	2.4 If Y/PY to 2.3: Were these deviations likely to have affected the outcome?			NA	
	2.5. If Y/PY/NI to 2.4: Were these deviations from intended intervention balanced between groups?			NA	

	2.6 Was an appropriate analysis used to estimate the effect of assignment to intervention?	PY	
	2.7 If N/PN/NI to 2.6: Was there potential for a substantial impact (on the result) of the failure to analyse participants in the group to which they were randomized?	NA	
	Risk of bias judgement	**Low**	
Bias due to missing outcome data	3.1 Were data for this outcome available for all, or nearly all, participants randomized?	Y	
	3.2 If N/PN/NI to 3.1: Is there evidence that result was not biased by missing outcome data?	NA	
	3.3 If N/PN to 3.2: Could missingness in the outcome depend on its true value?	NA	
	3.4 If Y/PY/NI to 3.3: Is it likely that missingness in the outcome depended on its true value?	NA	
	Risk of bias judgement	**Low**	
Bias in measurement of the outcome	4.1 Was the method of measuring the outcome inappropriate?	N	
	4.2 Could measurement or ascertainment of the outcome have differed between intervention groups?	N	
	4.3 Were outcome assessors aware of the intervention received by study participants?	N	
	4.4 If Y/PY/NI to 4.3: Could assessment of the outcome have been influenced by knowledge of intervention received?	NA	
	4.5 If Y/PY/NI to 4.4: Is it likely that assessment of the outcome was influenced by knowledge of intervention received?	NA	
	Risk of bias judgement	**Low**	
Bias in selection of the reported result	5.1 Were the data that produced this result analysed in accordance with a pre-specified analysis plan that was finalized before unblinded outcome data were available for analysis?	Y	

	5.2 ... multiple eligible outcome measurements (e.g. scales, definitions, time points) within the outcome domain?	N	
	5.3 ... multiple eligible analyses of the data?	N	
	Risk of bias judgement	**Low**	
Overall bias	**Risk of bias judgement**	**Low**	

Unique ID	SURPASS-2	**Study ID**	NCT03987919	**Assessor**	GL
