

Breeding of Horticultural Crops for Trait Improvement and Stress Resilience

Guest Editors:

Dr. Evangelia Stavridou

Department of Botany, School of Biology, Aristotle University of Thessaloniki, 54124 Thessaloniki, Greece

Dr. Panagiotis Madesis

Laboratory of Molecular Biology of Plants, School of Agricultural Sciences, University of Thessaly, 38446 Volos, Greece

Dr. Irimi Nianiou-Obeidat

Laboratory of Genetics and Plant Breeding, School of Agriculture, Forestry and Natural Environment, Aristotle University of Thessaloniki, P.O. Box 261, 54124 Thessaloniki, Greece

Deadline for manuscript submissions:

5 June 2024

Message from the Guest Editors

This Special Issue will encompass different aspects of novel approaches to stress tolerance, such as the use of multi-omics tools along with emerging genome engineering tools that can expand our understanding of how plant's physiology is modulated in response to the changing environmental conditions, the molecular mechanisms underlying stress tolerance in plants and our understanding of gene function. The use of such tools in horticultural breeding is expected to revolutionize the trait improvement of horticultural crops. Furthermore, the interaction with beneficial microorganisms to induce stress resilience will offer new insights into targeted breeding programs.

This Special Issue invites contributions of original research and review/mini-review articles on recent advancements in the field, specifically on trait improvement and stress resilience in horticultural crops, using integrated omics-oriented approaches and modern breeding tools. Contributions highlighting the usefulness of new genotyping, phenotyping and modelling techniques to improve the understanding and prediction of complex traits in breeding programs are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
