Message from the Guest Editors

Plant Genetic Resources (PGRs) have been acknowledged as the natural basis for sustainability, food security, and a pivotal pillar for food sovereignty. Currently, we stand in the epoch of applied biotechnology and a dynamic revolution regarding the means of PGRs valorization is occurring. The necessity for breeders to identify heritable genes from CWRs, followed by numerous selection cycles for introgression, has been superseded. Likewise, crosses from the tertiary genetic pool can be archived via embryo rescue methods, as well as a fusion of protoplasts. Additionally, genetic engineering and particularly directed modification methodologies (TALEN and CRISPR/Cas genome editing) have transformed the genetic landscape, since only the information of a gene's sequence is currently needed to create novel lineages.

The aim of this Special Issue is to provide a vehicle for scholars to present concepts and relevant studies (original research, opinions, perspectives, and reviews) across all aspects of the Plant Genetic Resources field (collection, characterization, and utilization) under the prism of Biotechnology.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
