Dr. Anastasia Prodromidou

Urogynecology Unit, 1st Department of Obstetrics & Gynecology, "Alexandra Hospital", National and Kapodistrian University of Athens, Lourou 2, 11528 Athens, Greece

Message from the Guest Editors

Urology focusing on women with dysfunction of the pelvic floor and the lower urinary tract. Pelvic floor disorders (PFD) include pelvic organ prolapse (POP), urinary incontinence (UI), defecatory disorders, chronic pelvic pain and sexual dysfunction. Recent therapeutic advances of both conservative and surgical treatments aim to improve women's quality of life by restoring pelvic floor normal function.

There is a rapidly expanding knowledge of the pathophysiologic mechanisms, the management and the diagnostic evaluation of PFDs. However, some of the functional and anatomical aspects of the pelvic floor remain elusive and complex. The identification of novel and innovative diagnostic modalities and therapeutic approaches of PFDs is of critical importance.

The aim of our Special Issue is to shed light on the progress made in the past years in the field of surgical treatment of PFD and on future challenges. Our article collection will review outcomes from traditionally used surgical interventions, as well as the cutting edge, emerging techniques in modern clinical practice.

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous*))
