Message from the Guest Editor

Dear Colleagues,

Cancer is a leading cause of death worldwide, with its mortality rate having increased in recent years. In addition, viral infections, such as COVID-19, influenza, HIV, Ebola, monkeypox virus, norovirus, chikungunya, etc., have become another threat to global health. Thus, it is crucial to develop rapid, accurate and cost-effective methods of early detection for cancer and viruses. With the rapid emergence of sensing techniques, a variety of sensors have been reported.

I would like to invite you to submit either original articles or review papers on sensors and methods for cancer biomarkers and virus detection.
