

## Supplementary Materials

**Table S1.** Multivariable logistic regression analysis of severe thrombocytopenia with addition of platelet counts before AZA treatment.

Factor	Thrombocytopenia	
	OR (95% CI)	<i>p</i> Value
Dose of AZA: 75 mg/m <sup>2</sup>	0.47 (0.12–1.87)	0.282
Days of AZA treatment: 7 days	1.46 (0.40–5.39)	0.570
SMD	4.27 (1.13–16.10)	0.032
Platelet counts < 75 × 10 <sup>3</sup> /μL	1.12 (0.31–4.07)	0.858

AZA, azacitidine; SMD: skeletal muscle depletion; OR, odds ratio; CI, confidence interval.
