Message from the Guest Editor

This Special Issue, “Wearable and Implantable Electronics for the Next Generation of Human–Machine Interactive Devices”, will summarize and focus on recent studies and technologies in wearable and implantable devices and their uses in and impacts on various applications. Areas of interest for this Special Issue may include but are not limited to:

Deadline for manuscript
submissions:

25 June 2024

- Novel materials for the wearable and implantable sensor applications;
- Advanced fabrication technology in making wearable and implantable devices;
- Energy harvesting technology and self-powered systems;
- New advancements in implantable electronics for chronic disease monitoring and biosignal sensing;
- Immersive wearables of virtual reality (VR) and augmented reality (AR);
- Machine learning techniques for remote healthcare and personal monitoring.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)
