Genomic Medicine and Policy

Collection Editors:

Dr. Christine Lu

Department of Population Medicine, Harvard Medical School and Harvard Pilgrim Health Care Institute, Boston, MA, USA

Dr. Kurt Christensen

1. Division of Genetics, Department of Medicine, Brigham and Women's Hospital, Boston, MA, USA 2. Harvard Medical School, Boston, MA, USA

Dr. Nina Sperber

Durham VA Health Care
System, Durham, NC, USA
 Department of Population
Health Sciences, Duke University
School of Medicine, Durham, NC,
USA

Message from the Collection Editors

The rapid development of genomic technologies has generated important questions for policy makers, health system leaders, laboratories, clinicians, patients, and the public. The *Journal of Personalized Medicine* aims to publish a collection of articles that explore the legal, ethical and economic challenges and opportunities of the field and provide fresh insights to ongoing discussions and debate in genomic medicine. We will consider original research, systematic reviews, and well-designed case studies and analyses that report empirical work that presents experiences and perspectives from the US and abroad.

The included topics in the issue are:

- Policy analyses of genomic medicine, including data privacy and sharing of results
- Ethical frameworks for genomic information disclosure, such as the disclosure of secondary findings in pediatric populations
- Comparative effectiveness of genomic medicine
- Economic evaluations of genomic medicine, including methods and challenges
- Implementation of genomic medicine in diverse health care settings, including methods and challenges
- Pricing, coverage and reimbursement of genomic medicine

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous*))
