Deadline for manuscript
submissions:

30 October 2024

Message from the Guest Editor

The introduction of therapeutic approaches such as intravenous thrombolysis and thrombectomy has improved the prognosis of stroke. These interventions require adequate structures and must be performed quickly to allow for the rapid recovery of the neurological deficit because stroke is a time-dependent pathology.

The economic and human resource costs of dealing with this pathology are high; therefore, it is important to act on the prevention. This Special Issue aims to collect works dedicated to the recent advance in vascular pathology screening, especially for stroke disease. There are various approaches that try to identify the warning or screening signs of stroke: administration of questionnaires to identify the risk factors, as well as diagnostic ones using artificial intelligence; biological markers and instrumental diagnostics; epidemiological and socio-economic studies linked to modifiable factors; possible prevention actions in subpopulations and genders predisposed to stroke; suggestion for guidelines for the management of the early diagnosis of stroke in adults and at a pediatric age considering the cardiovascular risk factors.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
