Deadline for manuscript
submissions:

20 October 2024

Message from the Guest Editor

Dear Colleagues,

The expansion of research in this area over the past half century has led to the extensive application of microencapsulation technologies in the pharmaceutical industry for both small molecules and macromolecules, thus overcoming different formulation and process challenges and achieving controlled drug release. The adaptation of microencapsulation technologies for nanoscale applications with the additional development of diverse exclusive nanotechnological platforms, as well as the progressive development of newly synthesized materials and the exploitation of excipients from renewable sources, may ensure the creation of a multitude of nanocarriers with specific characteristics, including stimulus-controlled release for use in target drug delivery, diagnostics, and theranostics. This Special Issue aims to highlight the current progress in the design and physicochemical characterization of micro- and nano-carriers, the assessment of their encapsulation capacity and in vitro/in vivo performances, as well as the permanently demanding aspects of formulation and process development for micro- and nano-encapsulated active ingredients.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
