Parameters		Rhizobacterial Isolates				
Isolate code	A5-1	A1-2	B8-3	B12-4	B9-5	B15-6
Identification of isolates according to NCBI	<i>B. licheniformis</i>	<i>A. caviae</i>	<i>B. cereus</i>	<i>P. flexa</i>	<i>B. licheniformis</i>	<i>B. simplex</i>
Microscopic appearance						
Accession No :	ON745408	ON745409	ON745413	ON745414	ON745412	ON745413
% Similarity	100	99.83	100	100	100	100
Isolate code	C6-7	C7_8	C1-9	A9-10	A10-11	
Identification of isolates according to NCBI	<i>P. flexa</i>	<i>A. veronii</i>	<i>P. aryabhattai</i>	<i>B. halotolerans</i>	<i>B. endophyticus</i>	

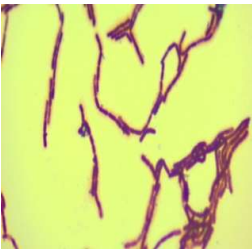

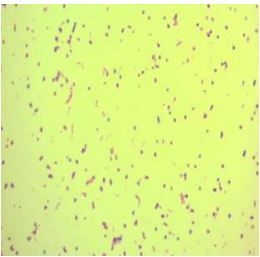

Microscopic appearance					
Accession No :	ON745414	ON745415	ON745416	ON745417	ON745418
% Similarity	100	100	100	100	100

Figure S1. Microscopic View of Rhizobacterial Strains Isolated from Maize Plants.

Table S1. Morpho-biochemical Characteristics of The Isolated Rhizobacterial Strains.

Bacteria identified	Gram Reaction	Shape	Motility	Catalase	Oxidase	SH	CIT	NR	MAL	LAC	GLU	SUC	FRU	XYL	GAL
A5-1	+	Short rod	Motile	+	+	-	+	+	+	-	+	+	+	+	+
A1-2	-	Short rod	Motile	+	+	+	+	+	+	+	+	+	-	-	-
B8-3	+	Short rod	Motile	-	+	+	+	+	+	-	+	+	-	-	-
B12-4	+	Rod	Motile	+	-	-	+	ND	+	+	+	+	-	-	+
B9-5	+	Rod	Motile	+	+	+	-	+	+	+	+	+	-	-	-
B15-6	+	Rod	Motile	-	+	-	-	+	+	+	+	+	-	-	-
C6-7	+	Bacilli	Motile	+	-	+	+	+	+	-	+	+	+	+	+
C7_8	-	Cocci	Motile	+	+	+	+	+	+	+	+	+	-	-	-
C1-9	+	Rod	Motile	+	-	-	+	+	+	-	+	+	-	-	-
A9-10	+	Cocci	Non-motile	+	-	-	+	+	+	-	+	+	+	ND	-
A10-11	+	Rod	Non-motile	+	+	-	+	+	+	-	+	+	-	-	+

Legend: - = negative, + = positive, ND=Not determined, SH=Starch Hydrolysis, CIT=Citrate, NR=Nitrate Reduction, MAL=Maltose, SUC=Sucrose, GLU=Glucose, LAC=Lactose, FRU=Fructose, XYL= Xylose, GAL=Galactose.

The calculation of Field Capacity (FC)

Add 6 kg of soil 3 Liters of Maximum Water Retention Capacity (MRC), i.e. 50 ml MRC water for 100 g of soil.
2/9 MRC water was used. i.e. $(3000 \text{ ml} \times 2)/9 = 666, 66 \text{ ml}$ or 670 ml.

For drought:

100%, 670 ml of water for 6 kg of soil was used.

50%, 335 ml of water for 6 kg of soil was used.

25%, 167 ml, 5, or 170 ml of water for 6 kg of soil was used.
