The journal *Fossils* [1], an interdisciplinary peer-reviewed scientific journal concerning all aspects of palaeontology, was launched in April 2023, under the leadership of the Editor-in-Chief, Dr. Eric Buffetaut. The journal has published a total of seven articles to date. It has now come to our attention that another publication source, although registered with a different proper title, is listed in some citation databases exclusively under the English title *Fossils*. To prevent any confusion among authors and readers, the editorial team has decided to change the title of the journal to *Fossil Studies*. This alteration has been approved as a minor change, not requiring a modification of the ISSN, avoiding potential confusion and citation issues.

The aims and scope of *Fossil Studies* remain consistent with those of *Fossils*: the journal continues to publish papers on all aspects of paleontology and the science of fossils. For a more detailed description of the contents, please refer to the Aims & Scope section in the Journal Menu on the homepage of *Fossil Studies* [2]. The new title reflects the high scientific standards that the journal strives to achieve.

We appreciate your interest in *Fossil Studies*. To publish your work under the non-restrictive CC: BY 4.0 license for immediate dissemination worldwide, please reach out to us.

**Conflicts of Interest:** The authors declare no conflict of interest.
