Message from the Guest Editor

Dear Colleagues,

Schizophrenia and schizoaffective disorder are disabling mental diseases that may manifest as a recurrent psychosis. Therefore, their treatment with antipsychotic drugs is essential. Adverse effects (for example, movement disturbances, and metabolic and cardiac adverse effects) reduce patients' adherence to medical treatment. In recent years, new antipsychotic drugs that interact with new specific receptors have been found and applied to the treatment of this disease. Have these new antipsychotic drugs made progress in the treatment of schizophrenic symptoms? Have they caused fewer adverse effects? Have they had a secure therapeutic effect? Has patients' adherence become more reliable, and have their schizophrenic symptoms therefore been treated better? Have therapeutic measures outside of pharmacological treatment made progress in the medical treatment of these symptoms? Your research papers and comprehensive reviews regarding these questions are warmly welcomed.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
