closed (30 June 2025)

Message from the Guest Editor

Globally, maternal and child mortality and morbidity among the marginalized are on the rise. A variety of social determinants, health inequality and racism affect the health and well-being of the marginalized group of mothers and children. In many parts of the world, marginalized mothers and children are living in precarious situations and facing violence, trauma, abuse, neglect, and compromised health. A set of robust, interdisciplinary, innovative and well-thought-out health promotion strategies and interventions are vital to reduce rising mortalities and morbidities among this marginalized group and promoting all aspects of their health and well-being. We are seeking research papers in this area that propose innovative solutions to improve the health and well-being of marginalized mothers and young children in diverse care settings.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
