submissions:

20 June 2024

Message from the Guest Editors

Preparation of personalized medicines in a hospital or community pharmacy allows variation of the quantity of each active ingredient within a preparation, as well as usage of combined substances which can be more efficient if mixed. The ability to personalize dosages is particularly useful when treating age groups with different needs -, e.g., children and the elderly. It is also useful when treating patients suffering from neoplasia or degenerative diseases that can cause a range of conditions and pain. The possibility to dispose of compounded drugs is also fundamental in the veterinary field where there are often no registered products on the market for a determined affection in an animal species.

This Special Issue of *Pharmaceutics* focuses on articles and reviews relating to formulations intended to meet the needs of specific patient populations—both human and veterinary. Particular attention will be paid to studies related to selecting the most suitable components, evaluating their compatibility and stability, developing standard operating procedures for the preparation and manipulation, and the quality assurance of the formulations.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
