Message from the Guest Editor

Dear Colleagues,

Emerging viral diseases, exemplified by the current COVID-19 pandemic, cause global disruptions to public health, financial systems, and even social stability. The continuous evolution of many viral pathogens, particularly surface antigens, contribute to waning immunity and the failure of existing immunotherapy. Another challenge is high co-infection rates among various types of viruses, complicating clinical management. There is an urgent need to identify new antiviral drugs and develop novel therapeutic strategies for mono- and co-infections. This Special Issue is a collection of articles on the latest research in antiviral-drug design, delivery, and potential of combined use for synergy.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
