

## Data Extraction Tool

**Study ID:**

**Title:**

**Lead author contact details:**

**Country in which the study conducted:**

1. United States
2. UK
3. Canada
4. Australia
5. Other

### Study Purpose:

**Study design:**

**Start date:**

End date:

**Study funding sources:**

## Participants

**Population description:**

**Setting:**

**Inclusion criteria:**

**Exclusion criteria:**

**Total number of participants who received therapy:**

### Baseline Population Characteristics:

|         | Age | Gender | Presenting Problem | Organism(s) causing infection | Prior treatment failure with standard of care? | Therapeutic Dead end? (IE facing amputation if not PT) |
|---------|-----|--------|--------------------|-------------------------------|--|--|
| Patient |     |        |                    |                               |  |  |

### Intervention and Comparisons, Outcomes, and Complications

[illegible]

|  | Number | Proportion (out of total patients receiving therapy) |
|--|--------|--|
| Number demonstrating infection eradication (clinical criteria alone)                                 |        |  |
| Number demonstrating infection eradication (arthrocentesis/ culture data supporting negative growth) |        |  |
| Number demonstrating infection eradication (PET Scan supporting)                                     |        |  |
| Total number with infection eradication  |        |  |
