Supplementary Materials

Table S1. Kinetic model parameters for the BIO-PUR systems.

		BIO-PUR2	BIO-PUR3
K₁	s ⁻¹	2.59E+09	2.04E+09
E₁	°K	5.76E+04	1.01E+04
K₂	s ⁻¹	7.32E+05	7.57E+04
E₂	°K	6.55E+03	5.56E+03
m		2.42E-01	4.96E-01
n		2.02E+00	2.39E+00
α_{c1}		-3.08E-01	-9.71E-01
α_{c2}		3.41E-03	5.00E-03
E_{d1}		-1.71E+02	7.28E+02
E_{d2}		8.10E-01	2.77E+01

Table S2. Viscosity model parameters for the BIO-PUR systems.

		BIO-PUR2	BIO-PUR3
η⁰	Pa s	1.73E-07	2.93E-06
E	°K	7011	6300.2
p1		-2.2	-4.4
p2		10.8	10.0

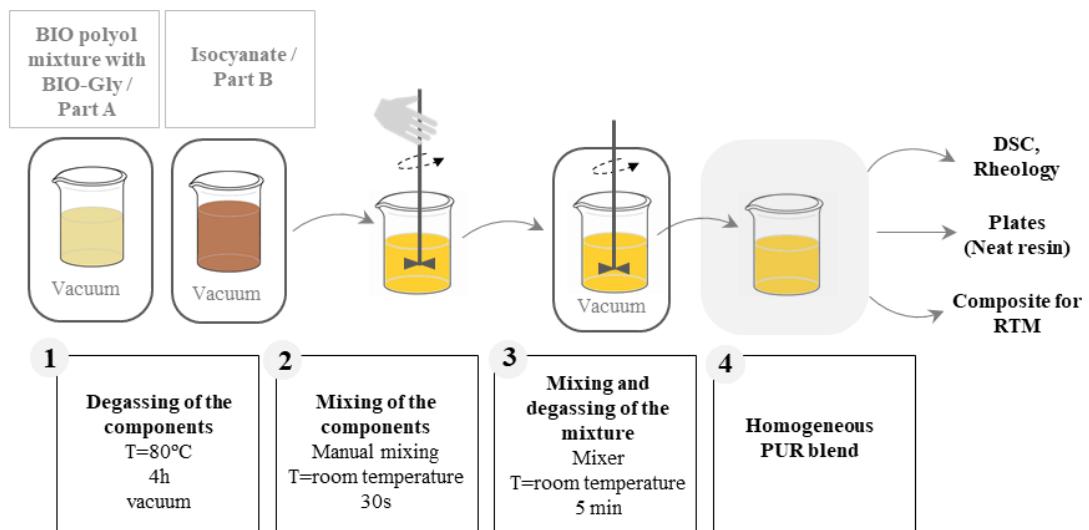

Figure S1. Polyurethane resin system preparation.

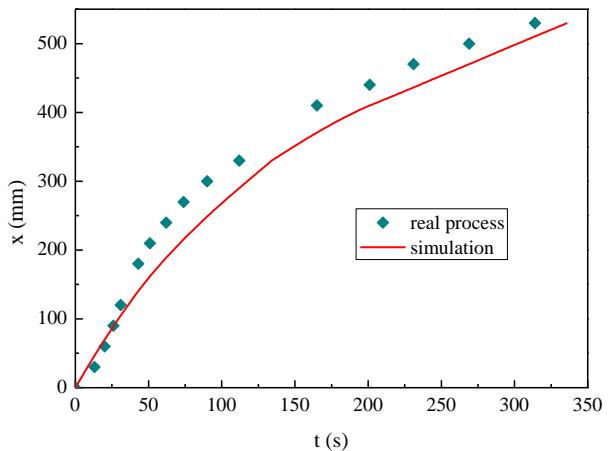

Figure S2. Flow front evolution for BIO-PUR3. Experimental (symbols) and simulation (—) results.
