

Table S1. Diffusion parameters of the arcuate fasciculus.

	Broca's area (L)	Broca's area (R)	Wernicke's area (L)	Wernicke's area (R)
FA	0.282815	0.358052	0.319494	0.338662
MD	0.000874	0.000783	0.000894	0.000829
FN	1024	1024	1024	1024

Anatomical region-of-interest seeds were placed in the left (L) Broca's and Wernicke's areas. The values of the contralateral side (R) are presented as reference. FA, Fractional anisotropy; MD, Mean diffusivity; FN, Fiber number.
