# Message from the Editor-in-Chief

Adolescence is a developmental period characterized by changes in all domains: physical, cognitive, psychological, socio-emotional and moral reasoning. Viewed from a life course socio-ecological perspective, adolescence provides opportunities and challenges to promote optimal health and development for public health professionals, scientists, and policy-makers.

As an open access journal, *Adolescents* provides a forum for discussion and dissemination of the science needed to guide and inform optimal health- promoting strategies during this developmental transition and generated by multiple disciplines. Please consider publishing your research in this high-quality peer-reviewed journal.
