Deadline for manuscript
submissions:

closed (31 March 2024)

Message from the Guest Editor

Dear Colleagues,

The importance of the central role of non-coding DNA driving neurodegeneration is captured by the identification of numerous polymorphic domains in non-coding DNA, from the analysis of GWAS and other studies directed at genomic structural variants being significantly associated with risk and progression for many neurodegenerative conditions. In addition to the direct effect of DNA on genomic regulation, the non-coding DNA directs the generation of regulatory RNA, of which there are many different classes with distinct roles in neurodegeneration. We would like to cover this range of diverse functions of the non-coding genome in a Special Issue of *IJMS*, “Understanding the role of non-coding DNA in Neurodegenerative Disease”.

Authors from all neurodegeneration disease backgrounds and areas are welcome. All regulatory mechanisms will be considered, demonstrating the wealth and diversity in the modulation of cellular signaling, chromatin 3D organization, and gene expression driving cellular phenotypic changes in both neuronal and neuronal cells associated with neurodegeneration.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
