Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

The current Special Issue will focus on emphasizing the timely research studies that address the existing new technologies used to remove pollutants from wastewater aiming the water reuse. The topics for the Special Issue should include but are not limited to the following areas: the different sources of pollutants; their fate and occurrence in the environment; toxicity and risk assessments; different methods employed to remove these pollutants from the environment; advances in analytical chemical and bioanalytical techniques for the identification and quantification of pollutants in aqueous systems; advances in technologies used to assess removal processes; and methods to assess the quality of the treated water aiming the reuse. We invite the authors to submit scientific studies that include original and innovative research papers, reviews, and short communications.

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology
and Environment, Centre
National de la Recherche
Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
