Note: PLA, palmitic acid; STA, stearic acid; OA, oleic acid; LA, linolenic acid; ALA, α -Linolenic acid; ARA, arachidonic acid; EPA, eicosapentaenoic acid; DPA, docosapentaenoic acid; DHA, docosahexaenoic acid. SCD index was estimated as ratio of OA to STA. Values are means $\pm$ SE for 10–11 rats. *, Statistically significant from control group ($P < 0.05$, Dunnett t-test).
