

Figure S2. The promoter-luciferase (Luc) reporter activity of SREBP-1 (5'-flanking promoter region of SREBP-1: -1477/+158; obtained from GeneCopoeia) was inhibited by GTEE (0.2 and 0.4 mg/mL) in PCa cells. The relative promoter-Luc activities were shown as the mean \pm SD of three independent experiments. ** $P < 0.01$, *** $P < 0.001$.
