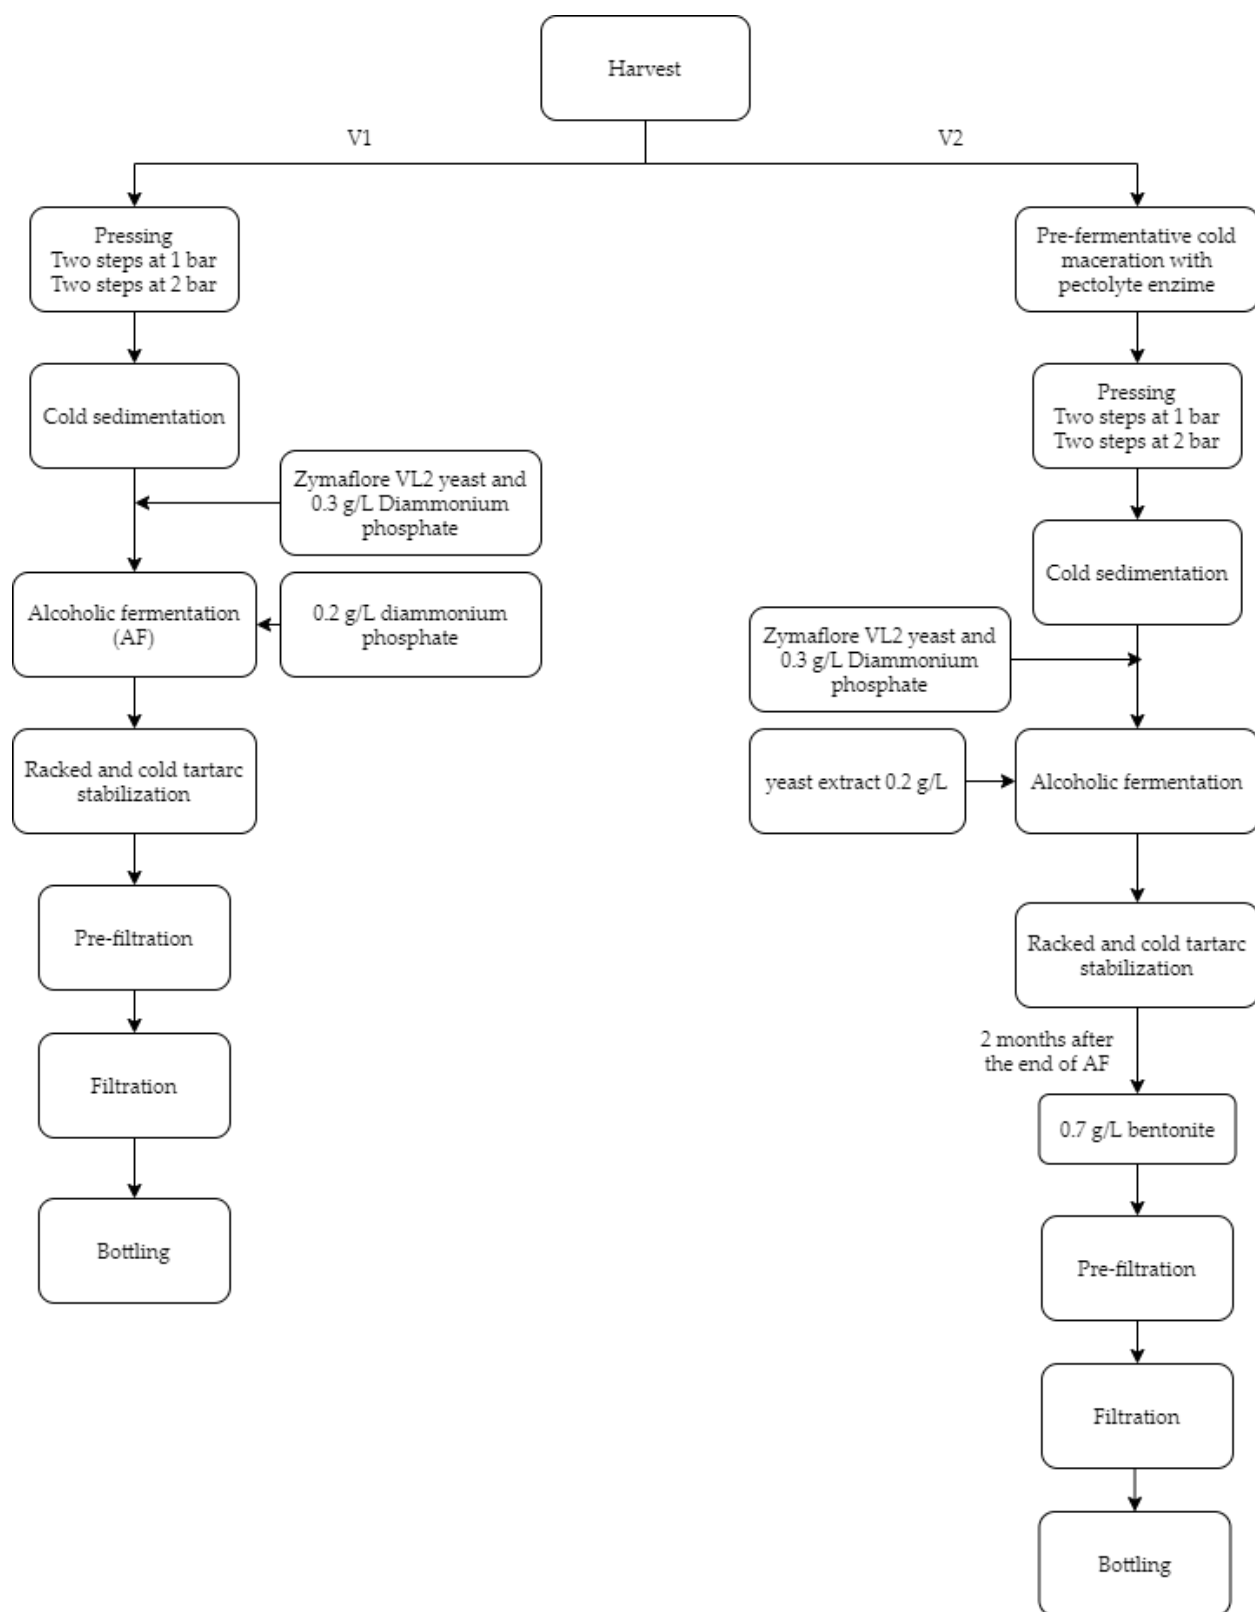

Figure S1. Flowchart of the control (V1) and experimental (V2) winemaking procedures.

Table S1. One-way ANOVA on the phenolic compounds for Time *versus* Retention Time (RT). Only the significant variables are shown according to Tukey HSD test (95% confidence). W: wine, 3, 6, 9, 12,18: months of storage in bottle. Different letters in the same column indicate significant differences evaluated by the *post-hoc* test.
