STAT3 binding site : GTGAATGGAAG
E box : CATGTG
E' box : CACGTT
E' long box : TATGTG
D box : TTATGTAA
Circadian transcription enhancing site : CCAATG
GC box : CGCCCC / GGGCGGG
Transcription start site (TSS) : CAGCGG

B

Supplementary Figure S1. Generation of live-cell bioluminescence reporter for monitoring of *PER2* expression in live cells. (A) Construction of pPER2:luc2P reporter contained the 5'-regulatory region of the *PER2* gene (-500/+50). STAT3 binding site (SBS), E-box, E'-box, D-Constructionbox, circadian transcription enhancing site (CTIES), GC-box, and transcription initiation site (TIS) are underlined. (B) Representative trace of bioluminescence of PER2:luc2P reporter. HaCaT/PER2:luc2P cells seeded to 96-well plates were synchronized with 100 µM dexamethasone for 2 h, then changed to the recording medium containing 1% fetal bovine serum and 1 mM luciferin in a phenol-free medium. Real-time bioluminescence of PER2:luc2P reporter was measured and recorded every 20 min for up to 90 h using Spark10M.
