

## Supplementary Information

**Figure S1.** CHOP expression was observed after transfection with siCHOP. Cells were transfected with control scrambled siRNA (siCont) or siCHOP, then incubated with or without 100  $\mu$ M ADMA for 24 h. Extracts were prepared in RIPA lysis buffer and were subjected to western blotting.

**Figure S2.** CHOP expression was observed after transfection with pcDNA3.1-GADD153. Cells were transfected with 2.5  $\mu$ g empty vector or pcDNA3.1-GADD153. Cells were collected and subjected to western blotting.
