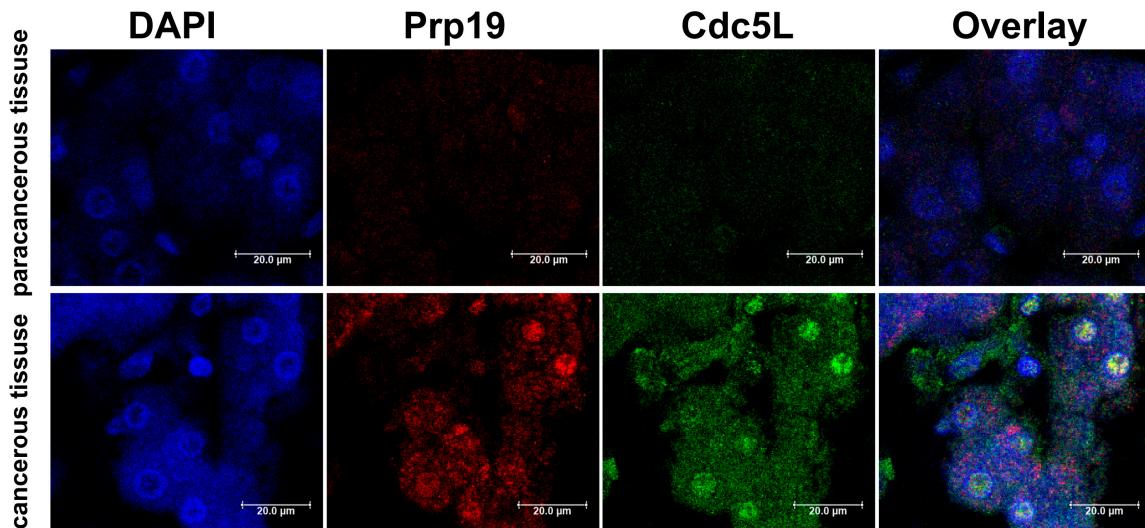

Figure S1. Immunofluorescence microscope images of Prp19 and Cdc5L in HCC and non-HCC tissue. (Upper panel, non-HCC tissue; Lower panel, HCC tissue).

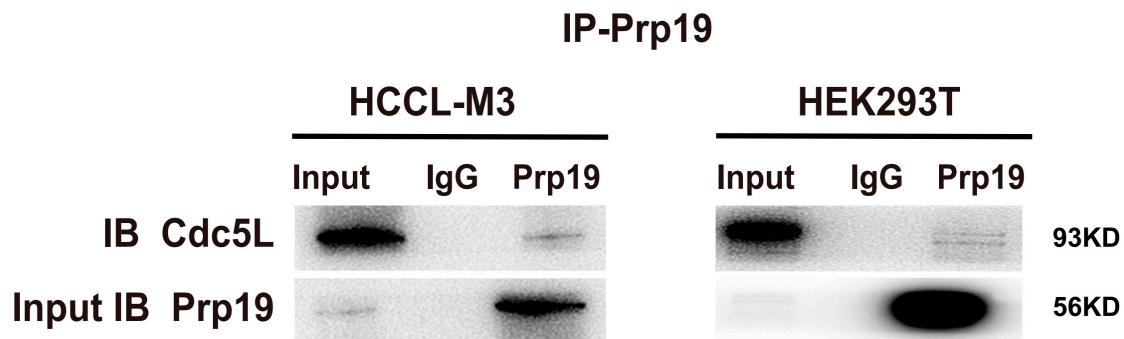

Figure S2. Endogenous interaction between Prp19 and Cdc5L was detected in HCCLM3 and HEK293T cells.

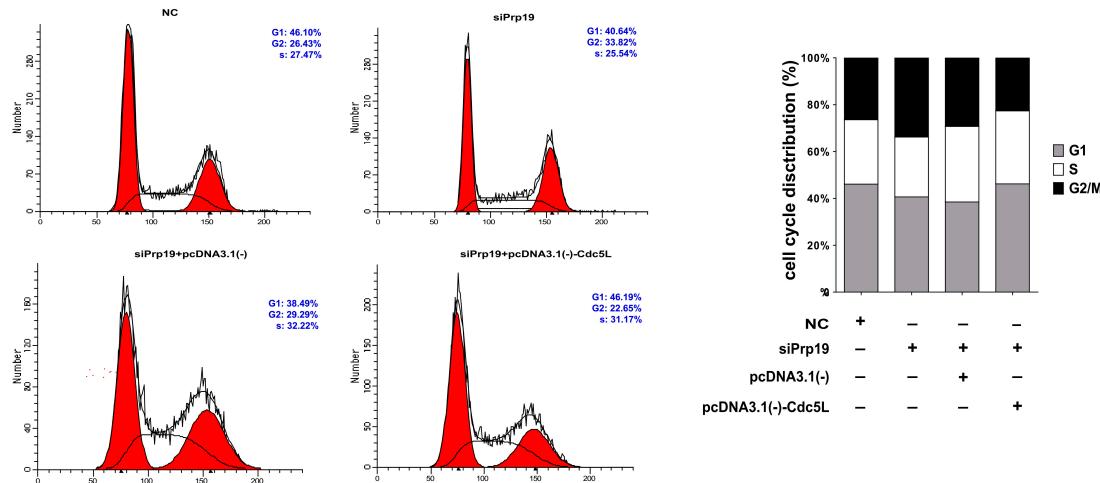

Figure S3. Flow cytometry analysis of cell cycle distribution of SMMC-7721 cells transfected with indicated siRNAs and plasmids in Figure 4A. Quantification of cell cycle shown in right panel.
