

Table S1. Numbers of proteins and PSM (peptide spectral matches) detected in three biological replicates of *Xoo*(EV) and *Xoo*(FleQ) from LC-MS/MS.

Strains	1st		2nd		3rd		shared proteins in 3 biological replicates
	protein	PSM	protein	PSM	protein	PSM	
<i>Xoo</i> (EV)*	1407	80137	1442	79940	1416	80069	1291
<i>Xoo</i> (FleQ)	1405	77960	1447	78010	1367	78154	1244

*Identified proteins and PSMs from *Xoo*(EV) were used in a study published recently [33].
